Candy Take Back 2017

Wow! What a fabulous response we had to this year's candy take back! We added two additional partners: MHC Cadillac and Manistee hospitals. Between all three participating hospitals, we collected over 1,000 pounds!

Below is a picture of Paxton Sisson who won a bike from McClain's Cycle in Cadillac. Also pictured is Dr. Vollbrecht, Medical Director of NMDI, with the Diabetes Education team from Munson Medical Center.

Interested in being a drop off site next year? Plan now!

2017 NMDI Annual Report

This year, NMDI was honored to interview a type 1 diabetes advocate and philanthropist-in-training. [Download](#) our 2016-2017 annual report to learn about his inspiring efforts in our region.

“How Care Managers Can Prepare Patients to Have the Most Successful DSME Appointment”

NMDI continues to find ways to support care managers as they work hard to support their patients with diabetes. Diabetes Self-Management Education and Support is a recommended standard of medical care in diabetes, it is evidenced-based and has equal A1C reductions compared to Metformin. Certified diabetes educators can work with care managers to support diabetes management plans. NMDI recently presented about this collaboration through the Michigan Care Management Resource Center. Listen to the recorded webinar: <http://nmdi.org/physicians>

2018 Standards of Medical Care in Diabetes

American Diabetes Association (ADA) annually releases diabetes treatment and care management recommendations for healthcare providers.

In addition to the standards of care updates, the committee will provide updates online throughout the year if evidence demonstrates inclusion. This is in part due to the rapidly changing technology available in the healthcare field. Additionally, the Standards of Care will be the sole source of the ADA's clinical recommendations

Here is a [link](#) to the summary of the revisions. NMDI has posted the full revisions on our website at: <http://nmdi.org/physicians>.
