In this issue: Increased range of results for reporting urinalysis chemistry analytes

June 2021, Vol. 9

Kathryn Haywood MT(ASCP)
William A Kanner, MD,
Editors

Due to moving to a new urinalysis analyzer, we will be reporting out a broader range of results for our current chemistry analytes (e.g. Glucose, Protein, Ketones). We will also no longer be reporting Ascorbic Acid as it will no longer cause an interference with the new analyzer test strips.

The new analyzer will go live June 22, 2021.
